

Independent Learning Project Summer 2

Year 1

The Earth, Our Home

During the school holidays you may want to do some additional learning in preparation for your new unit 'The Earth, Our Home'.

Below are some ideas but you can also let your imagination go wild! We would love to see what you do, maybe a poster, photos, a presentation, a model.... We hope you have lots of fun getting ready for your next bit of Learning!

The Earth, Our Home Summary

All living things – plants, animals and people – have a home or somewhere to live that we call a 'habitat'. A habitat can be huge like the ocean or small like a leaf. To survive, living things need to live in places that meet their needs. What do living things need to survive? How do different habitats provide for their needs? We will need to be scientists and geographers in order to answer these questions.

Project Ideas

- Find out about a threat to a World Habitat
- How can we conserve and protect habitats?
- What do you need to survive?
- Describe/Research different habitats
- Can you make a habitat for insects?

What ideas do you have?

Please bring your projects in to school the first week back!
