

Independent Learning Project Autumn

Year 6

Existing, Endangered, Extinct

During the school holidays you may want to do some additional learning in preparation for your new unit 'Existing, Endangered, Extinct'. Below are some ideas but you can also let your imagination go wild! We would love to see what you do, maybe a poster, photos, a presentation, a model.... We hope you have lots of fun getting ready for your next bit of Learning!

Existing, Endangered, Extinct Summary

Our planet is teeming with different species of living things that thrive and survive all over the world, some in extreme environments. In this unit we will learn more about how we classify animals, how living things are adapted to their environments and how all living things are interdependent. As part of the web of life, humans also have an important role to play. How is human behaviour threatening the survival of many species? Can we preserve the biodiversity of our planet?

Project Ideas

- What is Biodiversity? Find out about a Biodiversity hot spot
- Research one way in which human behaviour is threatening the survival of a species?
- Find out about a charity that is supporting animals from extinction, particularly Non-Government Organisations
- What are the seven signs of life
- Draw a food chain or web
- What is the Oxygen Cycle
- What are the Five Kingdoms or all living things?
- What is the difference between a vertebrate and an invertebrate?
- Find out about an endangered species
- Who was Charles Darwin?
- What is global warming? Can we stop it?

What ideas do you have?

Please bring your projects in to school the first week back!
