

# Independent Learning Project Spring 2

## Year 1

### Green Fingers

During the school holidays you may want to do some additional learning in preparation for your new unit 'Green Fingers'. Below are some ideas but you can also let your imagination go wild! We would love to see what you do, maybe a poster, photos, a presentation, a model... We hope you have lots of fun getting ready for your next bit of Learning!

#### Green Fingers Summary

We will be learning about plants and how important they are to our world. Plants are living things – they grow when we give them enough sunlight, food and water. Plants give us food to eat, clean air to breathe and materials to build our houses and furniture. We can use plants to make clothes and medicines, and to decorate our gardens. To fully engage with this unit, we will need to be scientists, geographers and international learners. How important are plants to our world?

#### Project Ideas

- Grow a Grass/Herb Head
- Go for a walk – what plants do you see?
- What is a plant?
- Draw and label the parts of a flower
- How do we use plants?
- Can you think of any events or times of year when you see certain plants at home?
- Do you know any plants that are used as emblems for a country?
- Do some flowers have particular meanings?
- Would it help the world/environment if we all ate less meat and more plants?

*What ideas do you have?*

**Please bring your projects in to school the first week back!**
