

Independent Learning Project Spring 2

Year 3 Island Life

During the school holidays you may want to do some additional learning in preparation for your new unit 'Island Life'. Below are some ideas but you can also let your imagination go wild! We would love to see what you do, maybe a poster, photos, a presentation, a model.... We hope you have lots of fun getting ready for your next bit of Learning!

Island Life Summary

Geographers and explorers estimate that there are over one million islands on earth! In this unit, we will be learning about the islands of the world, how they are formed, what life is like on some islands, as well as some of the threats to people's lives and their unique cultures. We will explore how islands range hugely in shape, size, location and climate but that they are all surrounded by water. We will need to be geographers and cartographers as well as artists and musicians. As almost one in ten people on earth live on an island, let's explore what some islands are like across the globe! Can you imagine what life would be like to live on a small island?

Project Ideas

- What do you think you might need to survive on a deserted island?
- Build/Design a shelter
- Write a message in a bottle
- Write a rescue story, maybe a newspaper report
- Design an Island Quiz
- Island Fact File
- What is culture? What is tradition? Create a poster about a chosen Island's traditions
- What kinds of things might put an island at risk?

What ideas do you have?

Please bring your projects in to school the first week back!
